\*\* This figure is greater than the total by months because monthly production figures from the new fields were not available until June 1937.

<sup>o</sup> Difference between total production for the new fields and the U. S. Bureau of Mines total.

\* Estimated.

The figures in the total production column are from the U. S. Bureau of Mines - Other figures are from various sources.

(1) Illinois' production of crude oil in the first 9 months of 1938 would supply the nation's needs for 4 4/10 days.

\*\* This figure is greater than the total by months because monthly production figures from the new fields were not available until June 1937.

<sup>o</sup> Difference between total production for the new fields and the U. S. Bureau of Mines total.

\* Estimated.

The figures in the total production column are from the U. S. Bureau of Mines - Other figures are from various sources.

(1) Illinois' production of crude oil in the first 10 months of 1938 would supply the nation's needs for 5 2/10 days.

\*\* This figure is greater than the total by months because monthly production figures from the new fields were not available until June 1937.

<sup>o</sup> Difference between total production for the new fields and the U. S. Bureau of Mines total.

\* Estimated.

The figure in the total production column are from the U. S. Bureau of Mines - Other figures are from various sources.

(1) Illinois' production of crude oil from the new fields in the first 11 months of 1938 would supply the nation's needs for 4 7/10 days.

\*\* This figure is greater than the total by months because monthly production figures from the new fields were not available until June 1937.

<sup>o</sup> Difference between total production for the new fields and the U. S. Bureau of Mines total.

\* Estimated.

The figures in the total production are from the U. S. Bureau of Mines - Other figures are from various sources.

(1) Illinois' production of crude oil from the new fields during 1938 would supply the nation's needs for 5 9/10 days.

\* This figure is greater than the total by months because monthly production figures from the new fields were not available until June 1937.

Estimated.

The figures in the total production are from the U. S. Bureau of Mines -  
Other figures are from various sources.

1 Illinois' production of crude oil from the new fields during January 1939 would supply the nation's needs for 1 3/10 days.

\* Estimated.

The figures in the total production are from the U. S. Bureau of Mines - Other figures are from various sources.

(1) Illinois' production of crude oil from the new fields in 1938 would supply the nation's needs for 6 days.

(2) Illinois' production of crude oil from the new fields during January and February of 1939 would supply the nation's needs for 2 4/10 days.

\* Estimated.

The figures in the total production are from the U. S. Bureau of Mines -  
Other figures are from various sources.

- (1) Illinois' production of crude oil during the first five months of 1939 would supply the nation's needs for 8 days.

The oil produced in Illinois during May 1939 amounts to approximately 31.4 per cent of the crude petroleum runs-to-stills in the Central Refining District which includes refineries in Illinois, Indiana, Kentucky, Michigan, and western Ohio.

## ECONOMIC STATEMENT

Since crude oil produced in Illinois fields is marketed mainly in the refineries of the Central Refining district (i.e., refineries in Illinois, Indiana, Kentucky, Michigan, and eastern Ohio), the ratio of monthly production in Illinois to total runs to stills in this district is of interest. For the first six months of 1939 the record is as follows (in thousands of barrels):

| <u>Month</u> | <u>Central Refining Dist.<br/>Runs-to-stills</u> | <u>Production<br/>in Illinois</u> | <u>Illinois' Per Cent of<br/>Runs-to-stills</u> |
|--------------|--|-----------------------------------|---|
| January      | 14,370   | 4,446                             | 30.9  |
| February     | 13,544   | 4,542                             | 33.5  |
| March        | 14,919   | 5,380                             | 36.0  |
| April        | 14,818   | 5,415                             | 36.5  |

\* Estimated.

Stocks of crude petroleum on hand in Illinois, April 30, 1939, were 12,195,000 barrels as compared with 11,357,000 barrels, April 30, 1938.

Stocks of refined products in the Central Refining District on April 30, 1939, compared with the previous year are as follows: (in thousands of barrels)

|                             | <u>1938</u> | <u>1939</u> |

ECONOMIC STATEMENT

Since crude oil produced in Illinois fields is marketed mainly in the refineries of the Central Refining District (i.e., refineries in Illinois, Indiana, Kentucky, Michigan, and eastern Ohio), the ratio of monthly production in Illinois to total runs to stills in this district is of interest. For the first 7 months of 1939 the record is as follows (in thousands of barrels):

| <u>Month</u> | <u>Central Refining Dist.<br/>Runs-to-stills</u> | <u>Production<br/>in Illinois<sup>o</sup></u> | <u>Illinois' Per Cent<br/>Runs-to-stills</u> |
|--------------|--|---|--|
| January      | 14,370   | 4,446   | 30.9   |
| February     | 13,544   | 4,542   | 33.5   |
| March        | 14,919   | 5,380   | 36.0   |
| April        | 14,818   | 5,415   | 36.5   |
| May          | 15,908   | 6,849   | 43.0   |
| June         | 16,000*  | 7,030*  | 44.0*  |

Stocks of crude petroleum on hand in Illinois, May 31, 1939, were 12,720,000 barrels as compared with 11,501,000 barrels, May 31, 1938.

Stocks of refined products in the Central Refining District on May 31, 1939, compared with the previous year are as follows (in thousands of barrels):

|                             | <u>1938</u> | <u>1939</u> |

ECONOMIC STATEMENT

Since crude oil produced in Illinois fields is marketed mainly in the refineries of the Central Refining District (i.e., refineries in Illinois, Indiana, Kentucky, Michigan, and eastern Ohio), the ratio of monthly production in Illinois to total runs-to-stills in this district is of interest. For the first 8 months of 1939 the record is as follows (in thousands of barrels):

| <u>Month</u> | <u>Central Refining Dist.<br/>Runs-to-stills</u> | <u>Production<br/>in Illinois<sup>o</sup></u> | <u>Illinois' Per Cent of<br/>Runs-to-stills</u> |
|--------------|--|---|---|
| January      | 14,370   | 4,446   | 30.9  |
| February     | 13,544   | 4,542   | 33.5  |
| March        | 14,919   | 5,380   | 36.0  |
| April        | 14,818   | 5,415   | 36.5  |
| May          | 15,908   | 6,849   | 43.0  |
| June         | 15,675   | 7,083   | 45.2  |

Stocks of crude petroleum on hand in Illinois, June 30, 1939, were 13,303,000 barrels as compared with 12,720,000 barrels, May 31, 1939, and 13,540,000 on June 30, 1938, the previous year.

Stocks of refined products in the Central Refining District compared with the previous year are as follows (in thousands of barrels):

ECONOMIC STATEMENT

Since crude oil produced in Illinois fields is marketed mainly in the refineries of the Central Refining District (i.e., refineries in Illinois, Indiana, Kentucky, Michigan, and eastern Ohio), the ratio of monthly production in Illinois to total runs-to-stills in this district is of interest. For the first 9 months of 1939 the record is as follows (in thousands of barrels):

| Month     | Central Refining Dist.<br>Runs-to-Stills | Production<br>in Illinois <sup>o</sup> | Illinois' Per Cent of<br>Runs-to-Stills |

ECONOMIC STATEMENT

Since crude oil produced in Illinois fields is marketed mainly in the refineries of the Central Refining District (i.e., refineries in Illinois, Indiana, Kentucky, Michigan, and eastern Ohio), the ratio of monthly production in Illinois to total runs-to-stills in this district is of interest. For the first 10 months of 1939 the record is as follows (in thousands of barrels):

| <u>Month</u> | <u>Central Refining Dist.<br/>Runs-to-Stills</u> | <u>Production<br/>in Illinois<sup>o</sup></u> | <u>Illinois' Per Cent of<br/>Runs-to-Stills</u> |

Stocks of crude petroleum on hand in Illinois, August 31, 1939, were 14,026,000 barrels as compared with 13,612,000 barrels, July 31, 1939, and 11,608,000 on August 31, 1938, the previous year.

Stocks of refined products in the Central Refining District compared with the previous year are as follows (in thousands of barrels):

ECONOMIC STATEMENT

Since crude oil produced in Illinois fields is marketed mainly in the refineries of the Central Refining District (i.e., refineries in Illinois, Indiana, Kentucky, Michigan, and eastern Ohio), the ratio of monthly production in Illinois to total runs-to-stills in this district is of interest. For the first 11 months of 1939 the record is as follows (in thousands of barrels):

| <u>Month</u> | <u>Central Refining Dist.<br/>Runs-to-Stills</u> | <u>Production<br/>in Illinois<sup>o</sup></u> | <u>Illinois' Per Cent of<br/>Runs-to-Stills</u> |
|--------------|--|---|---|
| January      | 14,370   | 4,446   | 30.9  |
| February     | 13,544   | 4,542   | 33.5  |
| March        | 14,919   | 5,380   | 36.0  |
| April        | 14,818   | 5,415   | 36.5  |
| May          | 15,908   | 6,849   | 43.0  |
| June         | 15,675   | 7,083   | 45.2  |

Stocks of crude petroleum on hand in Illinois, September 30, 1939, were 13,881,000 barrels as compared with 14,026,000 barrels, August 31, 1939, and 11,311,000 on September 30, 1938, the previous year.

Stocks of refined products in the Central Refining District compared with the previous year are as follows (in thousands of barrels):

ECONOMIC STATEMENT

Since crude oil produced in Illinois fields is marketed mainly in the refineries of the Central Refining District (i.e., refineries in Illinois, Indiana, Kentucky, Michigan, and eastern Ohio), the ratio of monthly production in Illinois to total runs-to-stills in this district is of interest. For 1939 the record is as follows (in thousands of barrels):

| Month     | Central Refining Dist.<br>Runs-to-Stills | Production<br>in Illinois <sup>o</sup> | Illinois <sup>1</sup> Per Cent of<br>Runs-to-Stills |
